

# Department of Molecular Biosciences

## Spring 2005 Seminar Series

**Mondays at 3:30**  
**Rm. 1005 Haworth Hall**  
**Lawrence, KS**

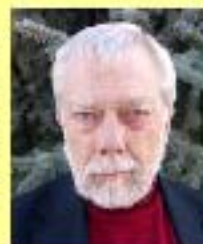

### **April 4 - Bioscience Initiative Lecture Series**

**Joseph Graves, Jr.**  
Fairleigh Dickinson University  
Dept. of Natural Sciences  
*What a Tangled Web He Weaves: Race, Reproductive Strategies, and Rushton's Life History Theory*

**April 11**

**Stephen St. Jeor**  
University of Nevada - Reno  
Dept. of Cell and Molecular Biology  
*Pathogenesis of New World  
Hantaviruses*

### **Thursday - April 14** **Division of Biology Lecture**

**Richard Myers**  
Stanford University  
Department of Genetics  
*Using Genomics to Understand  
Human Biology and Disease*

**April 18**  
**David Albertini**  
Kansas University Medical Center  
Full Professor of Molecular and Integrative Physiology  
*Centrosomes and Cell Polarity During the  
Egg-to-Embryo Transition in Mammals*

**April 25**

**Larisa Gubareva**  
University of Virginia - Charlottesville  
Dept. of Internal Medicine & Infectious Diseases  
*Antibody and Vaccine Design for  
Influenza - An Unexplored Link*

**May 2**  
**R. Michael Garavito**  
Michigan State University  
Dept. of Biochemistry & Molecular Biology  
*Lessons from the Structure Determinations  
of Prostaglandin H Synthase and  
Cytochrome C Oxidase*

**May 9**

**R. Scott Hawley**  
The Scowens Institute for Medical Research  
*The Molecular Genetics of Metasis*
