

Department of Molecular Biosciences Spring 2008 Seminar Series

3:30 PM - 1005 Haworth Hall - Lawrence Campus

FEBRUARY 18

Dr. Zena Werb

University of California-San Francisco
"Mechanisms of epithelial migration and invasion in mammary development and tumor progression"

FEBRUARY 25

Dr. Rathnam Chaguturu, G. Sitta Sittampalam and Scott Weir

University of Kansas

"Initiating Discovery Projects & Screening at KU-HTS: What, How and Who"

HIRATA LECTURE - MARCH 3

Dr. Thomas A. Waldmann

Center for Cancer Research, NCI, NIH

"The Contrasting roles of IL-15 and IL-2 in the life and death of lymphocytes: implications for cancer therapy and vaccine design"

MARCH 24

Dr. Warren J. Goux

University of Texas-Dallas

"Turning Amyloid on and off: Studies of Amyloidogenic Properties of Tau Related Peptides"

MARCH 10

Dr. John S. Gurn

The Ohio State University

"Francisella intramacrophage survival: phosphatases and virulence gene regulation"

MARCH 31- AKAGI LECTURE

Dr. Christian R.H. Raetz

Duke University

"Structure and Inhibition of Enzymes that Assemble Bacterial Endotoxins: Potent Lipid Activators of Innate Immunity"

APRIL 7

Dr. Gregory V. Plano

University of Miami

APRIL 21

Dr. Timothy S. Baker

University of California-San Diego

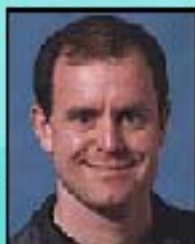

Topic: DNA Poised for Release in Bacteriophage Phi29

APRIL 14

Dr. James B. Skeath

Washington University-St. Louis

"A tale of two cells: regulation of asymmetric divisions in Drosophila"

APRIL 28

Dr. Peter C. Angeletti

University of Nebraska-Lincoln

Topic: HPV Replication
